This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

A Bibliography

PREFACE

When one stops to consider the overwhelming amount of printed material issued during the past five years about the war, one wonders if it will ever be fully organized for the use of students. Even within one division of the war material, such as English fiction, the number of volumes is still so large that any bibliography such as this can merely hope to serve as a beginning to the subject. Paradoxically, this aims to be a complete bibliography, as far as the study has gone. The number of titles included has been generous, because in so large a subject one must begin with the many and gradually thru further study eliminate the less useful works. Undoubtedly there are books included which would have been omitted had there been opportunity for more study of the actual texts instead of only reviews.

The bibliography has been limited in the following ways. Only American bibliographic sources have been used. Except for the three novels about Alsace-Lorraine, none have been included whose setting has not been within the war months, that is from August, 1914 to Armistice Day. This excludes the fiction dealing with reconstruction and other after the war problems, which make a subject by themselves. Fiction that only touches on war problems or is wildly improbable is of no interest to this subject and has been omitted as far as possible. An effort has also been made to distinguish closely between fiction and personal narratives and to omit the latter. The term "European war fiction in English" has been interpreted to include translations of fiction into

English, and both novels and bound collections of short stories when more than half the stories in a volume have war subjects.

The grouping has been made according to the country that forms the predominant background of each story and the subdivisions have been determined by the chief war interest discussed. The annotations are strictly from the point of view of the war content and not of literary merit. Comparisons have been included as much as possible.

Books marked with * have been read; those starred twice ** have been examined.

Personal Narratives of the European War

A Bibliography

By

Marion Davis Huntting

PREFACE

Since the war ended, and even before that time, there began to appear a great mass of material telling about experiences in the war zone but one never knew just what was worth reading because the articles, for they were mostly magazine articles at first, were written by every type of person,—by those who had never written anything before and by others who knew the best way of telling the things that they saw. The latter articles will be lasting and in the future will be source material for the study of the history of the European war.

Later, books began to appear and are still coming out in great numbers. Some of these are not worth reading but others will last for many years after the war has become merely history. It is the latter type of book and article which it has been the compiler's purpose to list.

This bibliography lists material in the Syracuse university library and the Syracuse public library. All the personal narratives of the war in both libraries have been carefully examined and only those which have been found to be really worth while have been noted.

All abbreviations used for magazines are those used by the Readers' guide. The other abbreviations are:

S. U. Syracuse university library.
